Buhler Aeroglide offers a high quality line of ovens and dryers to meet the thermal processing needs of the fiber and nonwoven industries. Building upon National Drying Machinery's experience and leadership, Buhler Aeroglide is now a worldwide supplier of drying, heat setting, annealing, curing and cooling solutions.

With a solid knowledge of fiber processing, the highest standards of product uniformity, and a thorough understanding of our customers' requirements, Buhler Aeroglide provides efficient thermal processing solutions to meet all demands. In addition to the thermal processing equipment, we also offer spike apron feeders and kudu feeders.

Buhler Aeroglide equipment is suitable for a wide range of fiber processes including acetate, acrylics, cellulose, nylon, rayon, polypropylene and pulpwood fiber.

Equipment Offering:

- Conveyor driers and coolers in single stage, multi-stage and multi-pass configurations
- Rapid high heat transfer impingement systems
- Drum driers
- Flat-bed through-air driers
- Thermal processing accessories
