

## SwissTex: Mastering Filament Yarn Technologies

SwissTex Winterthur AG (Switzerland) is a global manufacturer of textile machinery and a system provider with a profound knowledge of BCF and T&I extrusion processes for the continuous filament market. For many years it has offered complete extrusion systems and has now expanded its product range.

Since April 22, 2010, SwissTex France SAS (located in Valence, France) is a 100% affiliate of SwissTex Winterthur AG. SwissTex France has the experience of Verdol, ARCT, ICBT, Rieter and RITM. The French company is a process expert in Twisting, Assembling, Cabling, Covering & Winding of yarns made of synthetic, artificial, natural and mineral fibers. SwissTex France designs and manufactures machines for Technical yarn markets (Carpet, Industrial & Tire, Glass) and Textile yarn markets.

Thanks to this acquisition, which is a perfect complementation of its product line, SwissTex offers now to its customers complete filament yarn processing solutions.

*SwissTex is really a Master in Filament Yarn Technologies.*
